Professional Summary

Motivated data science enthusiast currently pursuing a Bachelor's degree in Engineering with a focus on Data Science. Passionate about transforming data into meaningful insights through statistical analysis, data visualization, and machine learning. Looking for opportunities to apply and expand my technical skills in a collaborative environment that encourages innovation and continuous learning.

Technical Skills

Languages: Python, SQL

Machine Learning: Scikit-learn, Feature Engineering, Predictive Analytics, Model Evaluation, Time Series Forecasting

Generative AI & NLP: LLMs, RAG, Transformers, LegalBERT, NLTK, SpaCy, TF-IDF, Text Classification

Deep Learning: TensorFlow, Keras, CNNs

Data Analysis & Visualization: Pandas, NumPy, Power BI, Matplotlib, Seaborn

Developer Tools: Git, GitHub, Flask, Docker, PostgreSQL, DBMS, Jupyter Notebook

Experience

Technocolabs Softwares Inc.

Data Science Intern

- Designed and implemented Logistic Regression and KNN models for classification tasks.
- Performed exploratory data analysis, data preprocessing, and feature engineering on structured datasets.
- Evaluated models using accuracy, precision, recall, and F1-score while preparing analytical reports.

Compcare Computer Centre

Data Science Intern

- Collected, organized, and prepared structured datasets for data analysis and machine learning applications.
- Performed data cleaning, preprocessing, and exploratory data analysis using Python.
- Created visualizations and analytical reports while collaborating on data-driven projects and documenting workflows.

Projects

AI-Based Legal Contract Risk Analyzer

NLP | LegalBERT | Transformers

- Developed an AI-powered legal contract intelligence platform for clause classification and risk assessment.
- Implemented TF-IDF, Logistic Regression, and LegalBERT models for automated contract analysis.
- Automated extraction of contractual clauses and legal risk indicators using NLP pipelines.

Real Estate Price Prediction

Machine Learning | Predictive Analytics

- Built a machine learning model to predict real estate prices using historical property datasets.
- Performed data preprocessing, feature engineering, and exploratory data analysis to identify key pricing factors.
- Trained and evaluated regression models to deliver accurate property valuations and support pricing decisions.

Electric Vehicle Market Size Analysis

Data Analytics | Forecasting

- Analyzed electric vehicle market data using sales, policy, and consumer datasets to identify growth trends.
- Applied exploratory data analysis and time series forecasting techniques to predict future market expansion.
- Delivered actionable insights through data visualization and trend analysis to support strategic business decisions.

Education

Kolhapur Institute of Technology, Kolhapur

2022 – 2026

B.Tech in Computer Science and Engineering (Data Science)

CGPA: 8.20

Vivekanand College, Kolhapur

2022

Higher Secondary Certificate (HSC)

82%

Holy Cross Convent High School, Kolhapur

2020

Secondary School Certificate (SSC)

92%

Publication

- AI-Based Legal Contract Risk Analyzer, DOI: 10.5281/zenodo.20213767

Certifications

- LLM Engineering: Master AI, Large Language Models & Agents (In Progress)
- Introduction to Career Skills in Data Analytics

Extra Curricular

Vice President | WWW, KITCOEK

- Led strategic planning and execution of student development initiatives in an IIT Bombay-recognized organization.
- Managed large-scale events, workshops, and leadership activities, enhancing student participation and collaboration.
